

# Will Legislators give us what we asked for?

*We don't want any more CDC Guidelines.  
And, we have had it with "safe and effective"!*

## SB412 Would Require:

- That a child seeking a medical exemption for a vaccination must submit a certification from a **physician licensed in West Virginia**, to a **State Immunization Officer** who is appointed by **"the commissioner"**;
- That the Immunization Officer's decision may be appealed to an **Immunization Appeals Oversight Board (created by SB412)**;
- That the decisions of the State Immunization Officer are subject to review by the **State Health Officer** who may determine that a number (5 in a 2-year period) of approved exemptions are incongruent with "medical evidence" in which case he will be subject to discipline;
- That criteria for a medical exemption be based upon current guidelines by the Center for Disease Control and Prevention;
- That the Immunization Appeals Oversight Board consist of physicians appointed by the deans of the three medical schools within the state;
- That members of the Immunization Appeals Board are immune from suit and liability and are not subject to subpoena;
- That there are detailed rules laid out for these processes;
- That all of the above will be paid for by you, the taxpayer.

### Senator Tom Takubo

is employed by *WVU Health System* as its executive vice president of provider relations.

He works for them, not for us!  
Let's fire him from the legislature.

## Let's Go, Mountaineers!

*We are not slaves. NO, we are Mountaineers and WE own this government!*

*Let's start acting like it.*

*We are not weak. A little beaten down, perhaps, but we are strong.*

Several legislators have signed the **Medical Liberty Pledge.**

"I hereby pledge that as an elected official I will oppose any government action and repeal/veto any law that would coerce or require any American to acquiesce to a medical product or procedure." <https://mlpledge.org/>  
Please—No Excuses!

## In 2024 we have choices!

Several health freedom bills have been introduced. Thank you, *Delegate Pritt* for HB4192. Thank you, *Delegate Crouse* for HB4403. And Thank you, *Senator Taylor* for SB257 We can make vaccines voluntary—as they should be.

These bills are in Health and Human Resources Committees of their respective chamber. Call and email committee members and tell them you want bodily autonomy and health liberty.
